THE ART OF DETERRENCE™

SECURITY AND TECHNOLOGY WORKSHOP CHOGM PERTH 2011, MASS GATHERINGS & TRANSPORTATION HUBS

Perth will play host to the Commonwealth Heads of Government Meeting ('CHOGM') in late 2011, requiring the largest police and security operation seen in Western Australia for many years. We acknowledge the impact and opportunities offered by such an event and the great deal of preparation and coordination involved. In particular, between Federal and State agencies, as well as WA business and industry.

To facilitate early discussion and security preparation efforts, Amlec House Pty Limited and Curtin University are teaming together to facilitate two day, specialist workshops entitled 'The Art of Deterrence' by Mr. Tomer Benito, a world renown security trainer.

This is intended to be a high level security workshop designed to facilitate relevance to CHOGM and early stage planning for key business and industry representatives, critical infrastructure operators, Federal and State Law Enforcement Agencies and the private security industry. Participants will be introduced to the fundamentals of security planning with relevance to the primary components of CHOGM's security requirements, the key risks and threats to Heads of Government and impacts on City and business activity during the lock down of City streets.

The Art of Deterrence™ interactive two-day training program provides you with a practical set of tools that can be applied promptly to any infrastructure environment. The course material will cover the planning of terrorist attacks at all stages, target selection, pre-incident indicators, threat mitigation, deterrence techniques, establishment and maintenance of independent intelligence systems, and security framework design.

Tomer Benito, our guest speaker, is a counter-terrorism expert who will discuss current issues related to the aforementioned and how they relate specifically to CHOGM. Topics of discussion will include but not be limited to: Detection of Suspicion; Determination of the Threat; Deployment of Procedures; and, Deterrence of Aggressors. Mr. Benito served as a Staff Sergeant in a special unit of the Israeli Defense Forces Paratrooper Brigade and was deployed in several positions securing Israel's infrastructures. In 2002 he was assigned to Los Angeles International Airport, as a security officer and expert in behavior assessment. Mr. Benito has developed training programs and initiatives that have been implemented by organizations worldwide. He is the author of *Rain for the Wicked*, various training manuals, and several articles in leading magazines. He is the regional representative of The International Tactical Officers Training Association and a member of several academic think tanks. **In May 2010, Mr. Benito will be sponsored by The Office of Homeland Security and Preparedness along with the U.S. Department of Homeland Security to present the Art of Deterrence.**

The Art of Deterrence™ is a proven approach that arms law enforcement specialists and security professionals with practical tools to strengthen their environment.

Pre-registration is required for this course no later than June 26, 2010 via the attached registration form. Please complete the attached form and forward as directed. For questions regarding this training please e-mail Chris Cabbage ccabbage@amlethouse.com. **Spaces are limited. A confirmation letter, including additional logistical information will be e-mailed directly to the attendees.**

***Patterns • Articulation • Red Teaming • Recognition
• Operational deployment • Testament of procedures***
