Behind every interview, observation, data entry, survey and exhibition lies a philosophy or paradigm of what it means to be human and how humans, including the researcher, relate to each other. These paradigms define what human reality is (ontology) and how the human is known (epistemology). Join Associate Professor Philip Moore as he takes a look at the paradigms that underlie various methods of research. It is hoped that the presentation and discussion will assist students to think critically about the logic of social and cultural inquiry and about the paradigms that shape their own research methods. Please bring along your working notes.

Curtin University Doctoral or Master (Research) students, honour students, early career researchers and supervisors welcome. (Please note our workshops do not meet the supervisor registry requirements). Presenters’ powerpoints, when available, can be located on our website - hgso.curtin.edu.au/student_info/workshops-1.cfm

RSVP
RSVP is essential. Please RSVP to humgraduatestudies@curtin.edu.au.

Please check your email regularly for the latest information on workshops including venues and times.
