

Curtin University

RESEARCH DATA

Planning, management and publishing

How to get help

- Marilyn Coen
 - Faculty Librarian for Humanities
- researchdata@curtin.edu.au

What I'll be covering

- Curtin policies
- What is research data?
- Resources available to you

Curtin policies

- Data must be kept for at least 7 years
 - Maybe longer
- Many projects require formal RDM
 - Higher degree by research
 - Human Research Ethics Committee approved

What is research data?

What needs to be kept to validate
the results of research?

- Artist's statements
- Artworks
- Architectural models
- Drawings
- Exhibition catalogues
- Musical annotations
- Survey forms
- Texts
- Audio recordings
- Databases
- Digitised 3D objects
- Images
- Interview transcripts
- Journals
- Spreadsheets
- Video recordings

Original or derivative data only!

Time for an ice breaker!

Getting to know you

- Chat to the person next to you and tell them:
 1. Your research topic
 2. How you are collecting your data
 3. How you are analysing your data
- Swap after two minutes
- Remember that they might not be in the same field as you

What was the point of all that?

Your next steps

1. Write a data management plan
2. Submit with ethics/HDR application
3. Request R: drive storage

Your supervisor makes the request

What your supervisor needs to know

1. Folder name (20 characters or less)
2. Folder size (in gigabytes)
3. Who else needs access
